

**ORNELLA MARELLI:** Assistant Professor of Pharmacology, School of Medicine, University of Milan. Degree in Biology. Professor of Pharmacology, Human Physiology and Immunology for student in Obstetrics and Professor of Pharmacology for students in Biotechnology and Speech and Language Therapy. Member of the Italian society of Pharmacology. Visiting Fellow at the Department of Immunology and Microbiology of UCLA, Los Angeles, in the 1980 for a year and at the Department of Immunology of The London hospital Medical School, London, from 1984 till 1991.

Principal investigator of many grants from academics, public and private institution. Research fields: immunotherapy and chemotherapy of experimental tumour. Involvement of Growth Hormone and Somatostatin on immune response. Study of out of frame peptides from BCR/ABL alternative splicing in Philadelphia positive leukaemia to develop a vaccine therapy. Expression of ghrelin receptor on neurons and peripheral tissues during ageing and inflammation. Study of SMAC mimetic molecules in autoimmune disease. Develop of a microfluidic and multiparametric platform to study rheumatoid arthritis.
