Dear Recruitment Committee of Università degli Studi di Milano,

I am a post-doctoral fellow at the chair of Econometrics and Empirical Economic Research, Martin Luther University of Halle-Wittenberg (MLU) since September 2015¹. Before joining MLU, I was a post-doctoral fellow at Collegio Carlo Alberto. I obtained my Ph.D. in Economics in May 2015 at the Paris School of Economics. I am getting in contact with you to apply for an Assistant Professor in Econometrics.

I am an applied microeconometrician and my work is applied to labor, happiness, education, migration economics, and demography. I currently collaborate with researchers from various disciplines (economists, statisticians, demographers) and various institutions (CESifo Group, University of Dortmund, Stockholm School of Economics, TED University, IZA, and Bocconi University). I work mostly on micro-data and specialized in panel data techniques and causal inferences. I use the software programs STATA and R for estimating models and have a profound understanding of Python and SQL.

I author numerous articles in the fields of labor, happiness, and family economics, organize workshops, give talks at many prestigious universities, research institutions, supervise bachelor and master students' thesis, and present at major economic conferences. I have been teaching courses on econometrics, statistics, and causal inferences since 2015. I act as a referee for many international journals and Turkish science foundation grants (TUBITAK).

I believe that Università degli Studi di Milano would be an excellent environment where I can pursue my research and teaching interests. I would be delighted to be part of the team and collaborate with researchers.

I look forward to hearing from you.

Sincerely,
Dr. Tugba Zeydanli

¹I was on maternity leave from July 2018 to June 2019. I am on maternity leave from July 2021 to June 2022
