- Funzione CERCA.VERT (o VLOOKUP): a cosa serve e come funziona
- La candidata legga e traduca la parte di testo in grassetto

Paying the Price of War
Summary

The global economy has been hit by Russia's invasion of Ukraine. Global economic growth stalled in the second quarter of 2022, and indicators in many economies now point to an extended period of subdued growth.

The war has pushed up energy and food prices substantially, aggravating inflationary pressures at a time when the cost of living was already rising rapidly around the world.

Global growth is projected to slow from 3% in 2022-to 2¼ per cent in 2023, well below the pace foreseen prior to the war.

In 2023, real global incomes could be around USD 2.8 trillion lower than expected a year ago (a shortfall of just over 2% of GDP in PPP terms).

Annual GDP growth is projected to slow sharply to ½ per cent in the United States in 2023, and ¼ per cent in the euro area, with risks of output declines in several European economies during the winter months.

Growth in China is projected to drop to 3.2% this year, amidst COVID-19 shutdowns and property market weakness, but policy support could help growth recover in 2023.

Gruppo di quesiti n. 2

- La candidata descriva quali sono le principali funzioni svolte dal Rettore ai sensi dell'art. 25 dello Statuto dell'Università degli Studi di Milano
- La candidata parli del trattamento fiscale dei rimborsi spese al personale esterno
- Cos'è una tabella pivot
- La candidata legga e traduca la parte di testo in grassetto
