

TO MAGNIFICA RETTRICE OF UNIVERSITA' DEGLI STUDI DI MILANO

ID CODE __7127_____

I the undersigned asks to participate in the public selection, for qualifications and examinations, for the awarding of a type B fellowship at **Dipartimento di _Economia, Management e Metodi Quantitativi_____**

Scientist- _____ in _____ - _____ charge: _____ **_Prof.** _____ **Luca**
Stella_____

Charles de Pierpont de Burnot

CURRICULUM VITAE

PERSONAL INFORMATION

Surname	de Pierpont de Burnot
Name	Charles

PRESENT OCCUPATION

Appointment	Structure
PhD candidate and teaching assistant	Université catholique de Louvain (UCLouvain, Belgium)

EDUCATION AND TRAINING

Degree	Course of studies	University	year of achievement of the degree
PhD	PhD in Economics and management	Université catholique de Louvain (UCLouvain, Belgium)	2025
Master	Master in Economics and Management	Université catholique de Louvain (UCLouvain, Belgium)	2019
Bachelor	Bachelor in Political Sciences, Minor in Economics	Université catholique de Louvain (UCLouvain, Belgium)	2017

REGISTRATION IN PROFESSIONAL ASSOCIATIONS

Date registration	of	Association	City
14/02/2024		European Doctoral Program in Quantitative Economics (Association of six universities)	Louvain-la-Neuve

FOREIGN LANGUAGES

Languages	level of knowledge
French	Native (C2)
English	Fluent (C1)
Dutch	Fluent (C1)
Italian	Basic (A1)
Latin	Reading ability

AWARDS, ACKNOWLEDGEMENTS, SCHOLARSHIPS

Year	Description of award
2024	FBW (Fédération Wallonie-Bruxelles) Travel Grant 2024
2024	FNRS (Fond de la Recherche Scientifique) Grant for research stay

TRAINING OR RESEARCH ACTIVITY

description of activity

Most of my projects and working papers are empirical and relate to migrations, trade and economic history. I am also part of a laboratory (*Service d'Analyse Economique*, LIDAM/IRES, UCLouvain) in charge of the economic forecastings for Belgium.

PROJECT ACTIVITY

Year	Project
2023-present	<p>The Economics of diversity: A meta-Analysis (in collaboration with Florian De Bundel, UCLouvain)</p> <p>My fourth research project conducts a meta-analysis of the economics of diversity, focusing on the effects of migration pattern diversity on local economic outcomes. Using U.S. and European data, the analysis also examines outcomes at multiple levels of aggregation to reconcile divergent findings in the literature regarding the impact of migration exposure and diversity. The (preliminary) results reveal that both positive and negative effects documented in prior studies can coexist at different levels in a country, providing a more comprehensive perspective on the economic implications of diversity and migration exposure.</p>

2024-2025	Belgian Economic perspectives (in collaboration with prof. Vincent Bodart, Vincent Notte, Leïla Van Keirslick, Florian De Bundel, Nathan Lachapelle, Alain Guilhet and Aurélie Bertrand) In charge of the economic forecastings of Belgium for the years 2025 and 2026.
2023-2025	The Roman roots of the Western Economic linkages My third research project examines the path-dependence relationship between economic links and political integration in Western Europe under Republican and Imperial Roman rule and economic linkages between the current European regions, to investigate whether the home bias observed in the trade literature is mitigated by strong economic and political integration prior to the emergence of national borders. Based on gravity models that allow the role of several geographical factors to be excluded from the estimates (including current trade costs), it provides empirical evidence that European NUTS2 regions that were highly integrated commercially and/or politically under the Roman Empire trade more and have stronger financial ties and business cycle synchronization in the early 21st century. Joint political integration under the Roman Empire is also associated with a sizeable decrease in the trade Home bias trade between regions belonging to different countries. Additional robustness checks suggest that cultural convergences is one of the main drivers of these observations.
2021	The costs of ending Shengen? Evidence from freight road Data (in collaboration with prof. Jean-François Maydstadt (UCLouvain) and Adam Levai (LISER)) This second research exploited sudden temporary increased controls at the national borders of countries in the Schengen area due to exceptional unexpected circumstances between 2011 and 2020 to estimate the impact of the Schengen area on trade, using regional trade data. The results suggest an absence of impact that may be driven by a lack of effectiveness in these border controls.
2020-2024	Immigrant Birthplace and Wages: Evidence from new US migration flows My first working paper relates to migration economics and the impact of immigrant birthplace diversity on local economic outcomes. This research examines the relationship between workers' real hourly wages and birthplace diversity in American metropolises at the beginning of the 21st century. By taking a more granular approach focusing on diversity at the level of local groups of workers, it disentangles the effects of birthplace diversity from other forms of heterogeneity, including occupation, industry, and workplace. This local level is also likely to capture the mechanisms associated with the exchange of ideas or conflicts as these are more likely to occur among individuals in the same local industries and professions due to the higher level of interactions and the local market mechanisms. This study explores both the positive effects of diversity on wages through increased complementarity among workers and the potential challenges arising from communication barriers and social tensions. Finally, it exploits variations in the migrant population composition arising from the increasing extra-European migration size and diversity to take into account cultural, norms, and background differences related to local diversities using a various panel of measures of cultural distances in augmented diversity indexes. The findings support a robust positive impact of immigrant birthplace diversity on (natives) wages at this granular level that differs from past literature findings at broader levels, and this relationship is stronger when diversity arises from migrants coming from high-income countries.

CONGRESSES AND SEMINARS

Date	Title	Place
09/2025	Bonn European Doctoral Program Jamboree 2025	Rheinische Friedrich-Wilhelms-Universität (Bonn, Germany)
04/2025	Paris School of Economics GPET Internal Seminar	Paris School of Economics (Paris, France)
07/2024	14th International Conference on economics of Global Interactions	Università degli studi di Bari Aldo (Bari, Italy)
06/2024	Paris School of Economics 2024 Migration Summer School Workshop	Paris School of Economics (Paris, France)
06/2024	Pompeu Fabra 2024 European Doctoral Program Jamboree	Universitat Pompeu Fabra (Barcelona, Spain)
03/2024	Leuven-Louvain Trade Seminar	Katholieke Universiteit van Leuven (Leuven, Belgium)
12/2023	Unamur 2023 Winter Doctoral Workshop	Université de Namur (Namur, Belgium)
09/2023	IRES Lunch Seminar	Université catholique de Louvain (Louvain-la-Neuve, Belgium)
03/2023	UCLouvain Spring Doctoral Workshop	Université catholique de Louvain (Louvain-la-Neuve, Belgium)
01/2022	Leuven-Louvain Trade Seminar	Katholieke Universiteit van Leuven (Leuven, Belgium)

PUBLICATIONS

Articles in reviews
Perspectives économiques 2025, Regards économiques, no 187, Louvain-la-Neuve, Université catholique de Louvain, 2025
Perspectives économiques 2024-2025, Regards économiques, no 185, Louvain-la-Neuve, Université catholique de Louvain, 2024

OTHER INFORMATION

IT skills: Stata, R, Python, MATLAB, ArcGIS and QGIS, Github, LaTeX, MS Office
Attendance at post-graduate courses: UCLouvain (2020, Belgium): Advanced topics in economics: GIS

Advanced topics in economics: Shift-share instruments and gravity models

ULB (2022, Belgium): Topics in Political Economics

ECORES PhD lectures (2025, Belgium): Effective programming practices for economists

Summer and Winter post-graduate schools:

Fondazione Eni Enrico Mattei Autumn School (2021, Italy): Spatial Analysis and Policy evaluation.

Paris School of Economics Summer School in Migration Economics (2024, France): Development impacts of migration and challenges in global markets

Teaching skills: Experience as a teaching assistant in Advanced Macroeconomics (Graduate, Research Master), Applied Econometrics (*Stata*), theoretical econometrics, Microeconomics, Regional economics and (Introductory course) Political Economy (Undergraduates)

Advanced knowledge in econometrics applied to experimental and quasi-experimental settings, data cleaning and management. Experience with large micro datasets (IPUMS and Eurostat survey data).

Declarations given in the present curriculum must be considered released according to art. 46 and 47 of DPR n. 445/2000.

The present curriculum does not contain confidential and legal information according to art. 4, paragraph 1, points d) and e) of D.Lgs. 30.06.2003 n. 196.

Please note that CV WILL BE PUBLISHED on the University website and It is recommended that personal and sensitive data should not be included. This template is realized to satisfy the need of publication without personal and sensitive data.

Please DO NOT SIGN this form.
