## TRAINING OR RESEARCH ACTIVITY

### Research activity

In my PhD thesis, I provide an innovative and complete analysis of the provincial administrative structures in the Egyptian Old Kingdom (2700-2160 BCE) based on a critical study of sources and building on a database containing about 1500 titled individuals. In this database, I have collected the available information concerning the whole individuals known in the provinces by at least one title. This database contains not only high-ranking provincial officials but also all the social groups around them, including the members of their extended family and their subordinates who are mentioned in their tombs with their own titles and relationships. If the prosopographical approach remains crucial for this topic, my aims could only be achieved by using a comprehensive approach and by conducting a crossover analysis of all the inscribed, iconographical and archaeological sources, may they be royal or private. After having deeply studied each level of the hierarchy, I was able to elaborate models of the provincial administrative system by identifying the main regularities. I have reconstructed the history of the mutations of the provincial administrative structures in the course of the Old Kingdom. I have also

elaborated a typology of the different provincial administrative structures, insofar as these structures were not at all homogeneous. I have constituted a list of twenty-two criteria that allowed me to classify the different provinces in several categories according to distinctive and common features.

After my PhD thesis, I started to apply a relatively new method, the Social Network Analysis (SNA) to these data in order to produce new scientific knowledge about the growth mechanisms and the perpetuation of the social position of the local elites in the late Third Millennium BCE.

I am currently developing new projects of research, one on the causes and processes of the emergence and the growth of the provincial elites, particularly from the end of the Vth Dynasty (c. 2350 BCE) and another including the study of the archives of the Egyptologist R. Weill which are kept in Paul-Valéry Montpellier 3 University.

## Training activity in history and in Egyptology

I followed courses in general history, geography, methodology and historiography, in history, archaeology and history of the art of Ancient Egypt as well as in Ancient Egyptian (Middle Egyptian, Late Egyptian and hieratic writing) at the Paris-Sorbonne University and the *École Pratique des Hautes-Études* (EPHE-Paris).

## Archival training

I was trained in archival studies (life cycle of documents, norms of conservation, filling plan, palaeography of handwritings etc.) and I graduated with a university degree in archival studies (Poitiers University). I did an internship of 6 months in the Departmental Archives of Morbihan (Vannes, France). I have classified several contemporary archival collections (written archives and photographs: physical ordering of the documents and redaction of an inventory with the software Arkhéia). After this internship, I was recruited as an archivist for one year in the same institution.

## Fieldwork experience

07-08/2010, 07-08/2011 and 07-08/2012: Participation as volunteer archaeologist: post-excavation of the Neolithic settlement of La Chevêtelière (Vendée, France), directed by Patrick Périody. Study of the objects, pottery and flint reassembling, section drawing and flint drawing on illustrator; prospecting.

07-08/2001, 07-08/2002, 07-08/2003 and 07-08/2004: Participation as volunteer archaeologist at the excavation of the Neolithic settlement of La Chevêtelière. Excavation, data collection, recording material, artefact cleaning, photographic recording, lithic artefact identification, topographical records.
