

UNIVERSITÀ DEGLI STUDI DI MILANO

Procedura di valutazione per la chiamata a professore di II fascia da ricoprire ai sensi dell'art. 24, comma 6, della Legge n. 240/2010 per il settore concorsuale 06/N2-Scienze dell'esercizio fisico e dello Sport (settore scientifico-disciplinare M-EDF-Metodi e Didattiche delle Attività Sportive) presso il Dipartimento di Scienze Biomediche per la Salute, Codice concorso 4335.

Martina Anna Maggioni

CURRICULUM VITAE

INFORMAZIONI PERSONALI (NON INSERIRE INDIRIZZO PRIVATO E TELEFONO FISSO O CELLULARE)

COGNOME	MAGGIONI
NOME	MARTINA ANNA
DATA DI NASCITA	13 Ottobre 1971

INSERIRE IL PROPRIO CURRICULUM
(non eccedente le 30 pagine)

**EUROPEAN
CURRICULUM VITAE
FORMAT**

PERSONAL INFORMATION

Name	MARTINA ANNA MAGGIONI
Address	ARNDTSTR. 30, 10965 BERLIN, GERMANY
Telephone	+49 157 31987757
E-mail	martina.maggioni@unimi.it martina.maggioni@charite.de
Nationality	Italian
Date of birth	13 OCTOBER 1971

**ACADEMIC POSITION AND
WORK EXPERIENCE**

2001-04	Inner student (Ph.D. Student Human Physiology, Nutrition and Body Composition) International Centre for the Assessment of Body Composition (I.C.A.N.S.), Department of Food Science and Microbiology, University of Milan.
2004-06	Research Fellow, Centre of Sports Medicine, Don Carlo Gnocchi Foundation, Milan.
2006-10	Researcher, "Institute of Physical Exercise Health and Sports Activity" IEFSAS Faculty of Exercise and Sport Sciences University of Milan.
2010-present	Assistant Professor of Physiology, "Department of Biomedical Sciences for Health", Faculty of Medicine, University of Milan.
2012-2018	Guest Researcher, Center for Space Medicine and Extreme Environment Berlin (ZWMB), Department of Physiology, Charité University Medicine, Berlin (GER).
1.11.2018-present	Research Associate (Senior), Institute of Physiology, Center for Space Medicine and Extreme Environments Berlin, Charité Universitätsmedizin Berlin (Charité University of Medicine)

EDUCATION AND TRAINING

- | | |
|--------|-------------------------------------------------------------------------------------------------------------------------|
| • 1990 | Secondary School Diploma-High school specializing in classical studies (Liceo Classico) (56/60) |
| • 2000 | English Certificate of C.E.L.T.-Centre of English Language Teaching, University of Western Australia (U.W.A.) Perth, WA |
| • 2001 | Graduation Exercise Sciences (Human movement) (full marks-110 cum laude) Faculty of Medicine, University of Milan. |

- 2004 Ph.D. Human Physiology, Nutrition, and Body Composition. University of Roma 2 "Tor Vergata" (Full Marks)
- 2017 German language Certificate T.E.L.C. C1- Hochschule, Berlin Germany
- 2019 Italian Scientific Habilitation (MIUR-Ministry of Education, Universities and Research) as Associate Professor (06/N2) in "Physical Training and Sports Sciences".

PERSONAL SKILLS AND COMPETENCES

MOTHER TONGUE Italian

OTHER LANGUAGES

ENGLISH

- Reading skills excellent
- Writing skills excellent
- Verbal skills excellent

GERMAN

- Reading skills excellent
- Writing skills good
- Verbal skills good

FRENCH

- Reading skills good
- Writing skills basic
- Verbal skills basic

TECHNICAL SKILLS

1. Athletes and sedentary people of different ages exercise testing procedures, for non-disabled and disabled people, with disability-specific ergometers.

Cardiopulmonary test for maximal oxygen consumption:

- Open-circuit method (Douglas Bags), Breath-by-breath portable metabolimeter (Cosmed K4 b2) and laboratory devices (for example Vmax29 SensorMedics /Quark B2 Cosmed).
- Resting and exercise electrocardiogram evaluation

2. Heart rate and blood pressure variability analysis, baroreflex sensitivity assessment

- Finometer PRO (non-invasive beat-to-beat blood pressure monitoring) & PORTAPRES/CNAP
- Polar (beat-to-beat heart rate monitoring and recording) & Faros ECG Monitoring System

3. Electrocortical activity & cognitive function. Electroencephalography data analysis and eLoreta; Heart-beat evoked potentials assessment. Cognitive tasks assessments.

4. Body composition assessment techniques:

- Skinfold thicknesses, Bioimpedance analysis, Dual X-ray Absorptiometry (DXA), BOD

POD-Air Displacement Plethysmograph (ADP), White Light Scanner, Underwater weighing

5. Nutritional status assessment:

- 7-days diary. Food frequency questionnaire and Sport-specific diet prescription

6. Computer/ Programming Skills

-Operating systems: MacOSx and Windows;

-Statistics software (SPSS, R)

-Software analysis for Heart Rate Variability (Kubios 2.0, Nevrokard 1.5, HRVanalysis)

- MATLAB & R

**TEACHING
RESPONSIBILITIES**

2006-present Advisor of Thesis and Dissertations in First Cycle – Bachelor's Degree of Exercise Science School and Second Cycle – Master Programs (in both Exercise Sciences for a healthy life and Individual and Team Sports Sciences)

2007-2009 Lecturer on Exercise Sciences for Disabled People Course. (First Cycle – Bachelor's Degree of Exercise Science School), University of Milan.

2008-2012 Lecturer on Exercise Physiology Course (First Cycle – Bachelor's Degree of Exercise Science and Sports School), University of Milan.

2007-2012 Practical. Laboratory Testing Course in Exercise Physiology (First Cycle – Bachelor's Degree of Exercise Science and Sports School)

2010-2012 Human Physiology Course (Faculty of Exercise Science and Sports), University of Milan.

2010-2012 Exercise Physiology for Health Course in Master Program Exercise Sciences for a healthy life, University of Milan.

2014- present Bioinformatics Master course, Physiology (Charité University of Medicine):

Lectures (Topics: Chronobiology, Exercise Physiology, Physiology of extreme environments, Body composition - English)

Practical (Topic: Body composition and Biosignal analysis - English)

2014- present Bioinformatics Bachelor course, Physiology (Charité University of Medicine): Lectures & Seminars (Topics: Chronobiology, Exercise physiology, Thermoregulation - German)

2014- present Medical curriculum course, Physiology (Charité University of Medicine): Seminars and Practical (Topic: Exercise Physiology – German)

Seminars and Practical (Topic: Energy expenditure and body composition –German)

Seminars (Topic Respiration in extreme environments- German and English)

Lectures, Seminars and Practical (Topic Physiology of extreme environments- German and English)

RESEARCH FIELDS

Body composition. Study of different techniques to assess body composition in healthy, athletic and pathological subjects (Spinal cord injured and mentally disabled subjects).

Exercise physiology. Effects of aerobic exercise on the cardio-respiratory and metabolic profile in healthy, athletic and pathological subjects; the metabolic cost of different locomotion patterns in healthy, athletic subjects and subjects with neuromuscular pathology. Effects of different training methods on performance in various sports.

Cardiovascular autonomic control and physical performance, especially in extreme environments. Studies on the heart rate variability as a method to determine training efficacy

and avoid the overtraining condition, and to test the hypothesis of the heart rate variability as a predictor of performance.

Cardiovascular autonomic control and brain function. Brain-Heart axis. Study of different Earth Analogues for spaceflight, as Bed rest, head out water immersion.

Chronobiology: circadian rhythm assessment in extreme environments, cardiovascular autonomic control and its interplay with core body temperature

PERSONAL STATEMENT

Martina A. Maggioni has accumulated years of experience in the development of methods of biosignals analysis. Already as a Ph.D. student, she is working in National Research Projects of the Italian Ministry of Health (1. "Study of body composition and its changes in subjects with neuro-motor disabilities" - 1999-2001; 2. "Study of cardiovascular risk factors in selected patient populations, including young people, the elderly, wheelchair users, and athletes" - 2001-2003), she began her experience in this specific field. She reached high expertise in the interpretation of the response of physiological control mechanisms to different conditions, as postural changes, autonomic diseases (especially those secondary to neuro-muscular disorders and spinal cord injury), aging, or living in extreme environments (high altitude studies), with the processing and analysis of biosignals. As a research fellow at Sports Medicine Centre, she developed great experience in exercise physiology and testing, especially by investigating: the effects of aerobic exercise on the cardio-respiratory and metabolic profile in healthy, athletic and pathological subjects; the metabolic cost of locomotion in healthy, athletic and in subjects with neuromuscular pathologies and by performing studies on heart rate variability as a method to determine training efficacy and avoid overtraining. She has long-time experience in rehabilitation programs, in particular regarding elderly and long-term hospitalized individuals. She also has active collaborations in the design, validation, and realization of advanced miniaturized devices for recording physiological variables interfering as less as possible with the subject activities.

As she joined the Centre of Space Medicine in Berlin, with her background in biosignals analysis and assessment of cardiovascular autonomic control, she was co-investigator in several studies (e.g. "Circadian Rhythm", currently on the International Space Station, ESA long-term bed rest). She also participated as a co-worker in collaborative studies with the "Alfred-Wegener-Institute for Polar- and Marine Research", studies designed to monitor physiological adaptations of small crews overwintering for > 12 months in Antarctic Station, which is suitable for space analogs. She also received a grant from DAAD - German Academic Exchange Service- for a project on an analog of microgravity: "Bed rest and head-out water immersion: acute effects on cardiovascular autonomic control and brain function. - The BRICAB study", where are investigated the effects of short-term simulated microgravity, induced by head-out water immersion and head down bed rest on brain function in humans and its underlying neurophysiologic mechanisms, using a model of cardiovascular-cortical integration. Currently, she is involved as co-investigator in SEVEN ongoing Projects, ESA & NASA Sponsored. Finally, she wrote as Principal Investigator a proposal for the ESA announcement of opportunity for human research using Concordia as human exploration analogue (ao-2017-Concordia), entitled: "Evaluation of circadian rhythm alterations by functional biomarkers during winter over at Concordia (CardiCortEx)", which on October 2018 has been selected with high scientific merit from the ESA review board.

GRANTS

2013- DAAD - German Academic Exchange Service - scholarship for the project: "Bed rest and head-out water immersion: acute effects on cardiovascular autonomic control and brain function. - The BRICAB study."

2013- 2024 Co-Investigator in several sponsored studies:

- European Space Agency (ESA) sponsored **ILSRA Spaceflight Study** (Circadian Rhythms).
- **ESA sponsored Bed Rest Study**, (Long-duration bedrest study at MEDES- Cocktail BR)
- **National Aeronautics and Space Administration (NASA) sponsored** study in the Human Exploration Research Analog (HERA C4).
- **NASA selected Bed Rest Study** (Hyper.Campus).
- Several following campaigns of "**Long-term isolation studies in Antarctica**" (Neumayer Station III).
- Co-Investigator in the project "**Human Sexual Wellbeing and Security in Isolation and Confinement (SWICE)**" AO-2017 selected proposal European Space Agency (ESA)

2019-2020 Co-Investigator Fondecyt Project, Chile. Project Title: **Investigation on the prevalence and blood pressure response in miners exposed to chronic intermittent hypoxia in Chile.**

2019-2024 Principal Investigator and study coordinator in the project "**Evaluation of circadian rhythm alterations by functional biomarkers during winter over at Concordia (CardiCortEx)**," AO-2017 Selected Proposal, European Space Agency (ESA)

2020-2023 Co-investigator in the Research Unit "**Climate Change and Health in Sub-Saharan Africa**" established by the **German Research Foundation (Deutsche Forschung Gemeinschaft -DFG)**

**CONGRESS &
INVITED
LECTURES
(SELECTION)**

6th International Symposium «In vivo body composition studies» October 3-5, 2002 Villa Mondragone, University of Rome 2 "Tor Vergata" -Italy

11th National Congress of So.M.I.Par, in association with European Meeting of I.S.Co.S 2003, Genova

Pre-congress Meeting on Nutrition and American College of Sports Medicine - ACSM- ANNUAL MEETING May 28-31, 2003, San Francisco, California (US)

Invited Lecturer in Congress and Educational Course Exercise Therapy for Spinal cord injury people: from research to application in Spinal Unit. Niguarda "Ca' Granda" Hospital, Milano (ITA) 2005.

62th SIF (SIF: Italian Physiological Society) National Congress, Sorrento (ITA) 2011

SISMES (SISMES: Italian Society of Sports and Movements Sciences) Congress, Verona (ITA) 2011

American College of Sports Medicine - ACSM- ANNUAL MEETING May 29- June 2, 2012, San Francisco, California (US).

19th IAA Symposium Humans in Space –Linking the challenges of space exploration with medicine on Earth July 7-12 2013, Cologne, (GER)

6th International Congress of Medicine in Space and Extreme Environments (ICMS) September 16-19 2014, Berlin, (GER)

52. Jahrestagung der Deutsche Gesellschaft fuer Luft-und Raumfahrtmedizin (DGLRM) – 52th Annual Meeting of the German Association of Aviation and Space Medicine (DGRLM) – 23-25 October 2014 Heidelberg, (GER)

Nationales Symposium „Forschung unter Weltraumbedingungen“ Landesmuseum Bonn 28 -30 Oktober 2015, Bonn, (GER)

20th IAA Human in Space Symposium (HIS) June 29- July 07 2015 Prague, (CZECH REP)

Invited Lecturer - Physiology Seminars, Faculty of Medicine, Pontificia Universidad Javeriana, Bogotá-Colombia:

- a) Cardiac autonomic modulation. Heart rate variability in clinic and in research
 - b) Cardiac Autonomic Modulation in Extreme Environments: from Earth to Space
- Bogotá 22-27 November 2017 (COL)

European Space Agency (ESA) AO-2017-Concordia Proposal Workshop Einstein meeting room ESTEC, ESA 19-20 February 2018, Noordwijk, (The Netherlands)

International Society for Gravitational Physiology (ISGP) and European Space Agency (ESA) Life Sciences Meeting 2018 (which combines the 39th Annual International Gravitational Physiology Meeting and the ESA Space meets Health initiative), Noordwijk, the Netherlands 18-22 June 2018

69th International Astronautical Congress, IAC2018, 2- 5 October 2018 Bremen (GER)

AO-2017-Concordia Investigator Working Group Meeting, November 2018
European Space Research and Technology Centre, Noordwijk, The Netherlands

Invited Lecturer – Physiology course: Heart rate variability in extreme environments, Universidad de Antofagasta, Chile.

- Lecture, theoretical and practical course,
Antofagasta, 29-30.08.2019 (CHILE)
