Research Profile

I am a Post Doctoral researcher at the Sapienza University of Rome in the Geometric & Visual Computing group led by Emanuele Rodolá where I am leading the work package WP1 - Theoretical foundations of the ERC Starting Grant 802554 (SPECGEO) project. I was a Post Doctoral researcher at the École Polytechnique, in the team of Maks Ovsjanikov at the Laboratoire d'Informatique (LIX) in Paris (France) for six months and previously at the Università degli studi di Verona (Italy) from November 2017 to October 2019. I received my Ph.D. in Computer Science at Università degli studi di Verona (2018), and graduated in math at University of Milan "La Statale" (2013). I received The Marie-Curie Individual Fellowships and the Seal of Excellence for the H2020-MSCA-IF-EF-ST-2019 proposal NON-LINFMAPS, (score 92.20/100), the BE-FOR-ERC 2020 grant 2020 in the role of Principal Investigator as post Doctoral researcher at Sapienza University of Rome and the EG-Italy PhD thesis award (2018).

I work on geometry processing, 3D shape analysis and artificial intelligence. I published around 30 papers on these topics in top-tier venues and journals in computer vision and graphics (TOG, PAMI, CGF, CAG, SIGGRAPH, NIPS, ICCV, CVPR, EUROGRAPHICS, SGP). I were involved in the program committee of several international and top-tier conferences for which I served as chair and reviewer. I maintain fruitful collaborations with many world leaders in this area both with academic institutions and companies.
