COGNOME	COMI
NOME	GIOVANNI EUGENIO
DATA DI NASCITA	23 OTTOBRE 1991

PERSONAL STATEMENT

My main interest is Geometric Measure Theory. One of my current researches, started during my PhD under the supervision of Prof. L. Ambrosio, concerns a new distributional characterization of the notion of sets of finite fractional perimeter, which leads to a new space of functions of fractional bounded variation. In addition, I am studying the theory of divergence-measure fields and the generalizations of the Gauss-Green formulas in non-Euclidean contexts, such as stratified groups and general metric measure spaces. Other topics which are of interest for me are Optimal Transport, Calculus of Variation and Harmonic Analysis.
