GIORGIA MOSCHETTI

CURRICULUM VITAE

INFORMAZIONI PERSONALI

Cognome	Moschetti
Nome	Giorgia
Data Di Nascita	24/03/1991

OCCUPAZIONE ATTUALE

Incarico	Struttura
Post Doctoral Fellow	Fondazione Istituto Nazionale di Genetica Molecolare (INGM) "Romeo ed Enrica Invernizzi", Milano

ISTRUZIONE E FORMAZIONE

Titolo	Corso di studi	Università	anno conseguimento titolo
Laurea Magistrale o equivalente	Biologia Molecolare della Cellula	Università degli Studi di Milano	2015
Dottorato Di Ricerca	Experimental and Clinical Pharmacological Sciences	Università degli Studi di Milano	2019

LINGUE STRANIERE CONOSCIUTE

Inglese	C1
---------	----

PREMI, RICONOSCIMENTI E BORSE DI STUDIO

anno	Descrizione premio
2019	Best Poster Award: XVIII Congresso Nazionale Società Italiana Neuroscienze (SINS)
2019	Best Poster Award: Gruppo Italiano Staminali Mesenchimali (GISM) 2019 Annual Meeting Congress
2019	Hellobio Travel Grant for the 7th International Congress on Neuropathic Pain (NeuPSIG2019)
2018	Bio-techne Travel Grant for the 11th FENS Forum of Neuroscience
2018	Selected for the participation to the European Pain School (EPS 2018), "Pain from fetus to old age"

UNIVERSITÀ DEGLI STUDI DI MILANO

2017	Best Poster Award: 38° Congresso Nazionale della Società Italiana di Farmacologia
2017	YAP (Young Against Pain) Selected project: IX SIMPAR- ISURA Congress (Study in Multidisciplinary Pain Research)
2016	Winner of a PhD fellowship from the University of Milan

ATTIVITÀ DI FORMAZIONE O DI RICERCA

Research experience:

- **March 2020 - current: Post doctoral Fellow; Autoimmunity Lab - Prof. Jens Geginat**
Fondazione Istituto Nazionale di Genetica Molecolare (INGM) "Romeo ed Enrica Invernizzi"- Milan, Italy

Phenotypical and functional characterization of peripheral blood-derived CD4+ T-cells in patients and mouse model of immune deficiency caused by a mutation in STAT3 (Hyper-IgE syndrome, HIES), with a particular focus on Th17 and their precursor cells. Evaluation of the ability of these cells to response to antigens belonging to opportunistic pathogens, such as *S. Aureus*, *S. Pneumonia*, *E.coli*, *M. Tuberculosis* and *C. Albicans*, that cause recurrent infections in HIES patients.

Other projects:

- Role of T-cells in injury evolution after aneurysmal subarachnoid haemorrhage: clinical and experimental study.
 - Effects of SARS-CoV-2 infection in CD4+ T-cells of immunodeficient patients (X-linked agammaglobulinemia and Common Variable Disease).
 - Study of TARget tissue-resident immune cells in Graves disease and Orbitopathy (STAR-GO).
 - Characterization of an intestinal CD4+ Th17 T lymphocytes subsets associated with inflammation in Crohn's Disease and activated by adherent-invasive Escherichia coli (AIEC).
- **Nov 2017 - Jun 2018: Visiting PhD Fellow; Neurophysiology Lab - Prof. Michaela Kress**
Dept. of Physiology and Medical Physics, Medical University of Innsbruck - Austria

Evaluation neurotoxicity induced by the chemotherapeutic drugs (vincristine and bortezomib) exposure in murine primary sensory neuron cultures. Analysis of the possible preventive effect of blocking Prokineticin2 (PK2), an insult-inducible endangering mediator, in order to identify a promising strategy for neuroprotective therapies against the sensory neuron damage induced by exposure to chemotherapy.

- **Oct 2016 - Dec 2019: PhD Student; Pathophysiology of pain, neuroimmunology and drug of abuse Lab - Prof. Paola Sacerdote**
Dept. of Pharmacological and Biomolecular Sciences, University of Milan - Italy

Analysis of neuroinflammation, with a particular focus on the role of a chemokine family, the prokineticins (PKs), in the development and progression of experimental chemotherapy induced peripheral neuropathy (CIPN) due to the administration of bortezomib and vincristine. Use of a PK receptor antagonist (PC1) to counteract neuropathic pain symptomatology, mood alterations and neuroinflammation.

Other projects:

- Effects of different routes of administration of human adipose-derived mesenchymal stem cell secretome on pain and neuroinflammation in a mouse model of osteoarthritis.

- Impact of morphine on postoperative immune function in patients undergoing major surgical interventions.
- Comparison between tapentadol and morphine on pain behaviour and splenic cytokines production in a mouse model of chronic constriction injury.
- **Jan 2016 - Sept 2016: Postgraduate Student (Helsinn S.p.A. Fellowship); Pathophysiology of pain, neuroimmunology and drug of abuse Lab - Prof. Paola Sacerdote**
Dept. of Pharmacological and Biomolecular Sciences, University of Milan - Italy

Evaluation of the effects of Nonsteroidal anti-inflammatory drugs (NSAIDs; i.e. nimesulide, etoricoxib, and ketoprofen), commonly used in the treatment of migraine, on the release of Calcitonin Gene-Related Peptide (CGRP) and Prostaglandin E2 (PGE2) from rat trigeminal ganglia.
- **Oct 2014 - Dec 2015 Master Degree Internship; Pathophysiology of pain, neuroimmunology and drug of abuse Lab - Prof. Paola Sacerdote**
Dept. of Pharmacological and Biomolecular Sciences, University of Milan - Italy

Identification of the effects on pain symptomatology and on the immune system due to the administration of human adipose derived mesenchymal stem/stromal cells (hASC) and their conditioned medium (hASC-CM) in a mouse model of diabetic neuropathy. In particular, animal health was assessed by measuring weight and blood glucose levels at different time points after treatment. Also painful symptomatology, neuroinflammation, skin innervation loss and peripheral immune cells (splenocytes) were monitored in order to evaluate hASC and hASC-CM potential as therapeutic treatments.
- **Mar 2013 - May 2013: Bachelor Degree Internship; Foiani Lab**
IFOM- the FIRC Institute of Molecular Oncology - Milan, Italy

Analysis of yeast mutant cell cultures using optical and fluorescent microscope and cytofluorimetric analysis.

Scientific Skills:

- **Human Samples Preparation:**
Isolation of leukocytes (CD4+, CD8+ T lymphocytes; monocytes) from peripheral blood, liquor, tonsils, intestine biopsy and lymph nodes/thyroids fine needle aspiration biopsies.
- **Cell Culture Preparation and Maintenance:**
Humans:
CD4+ T lymphocytes subsets obtained from blood, liquor, lymph nodes, tonsils, thyroids and intestine.
Co-cultures of CD4+ T- and B- lymphocytes;
Mice:
Dorsal root ganglia (DRG) primary sensory neurons, splenocytes and macrophages.
- **Assays:**
CD4+ T-cells: Antigen specificity (peptides) and heat killed bacteria stimulation; T-cells polyclonal activation; T cell suppression;
Boyden chamber assay;
Total protein dosage and ELISA assay;
Neurite outgrowth assay from mouse DRG neurons;
- **Flow Cytometry:**
Preparation of human and murine samples for the analysis of surface/ intracellular/ intranuclear markers and phosphorylated STAT proteins for Flow cytometry;
Independent user of BD FACSCanto™ II (3 laser) and BD FACSymphony™ (5 laser).

UNIVERSITÀ DEGLI STUDI DI MILANO

- **Fluorescent immunocytochemistry:**
Preparation of samples for the analysis of protein of interest; analysis at fluorescent/confocal microscope.
- **Immunohistochemistry:**
Preparation of samples for staining with primary/secondary antibodies of interest or with Luxol fast blue and Hematoxylin and Eosin.
- **Molecular Biology:**
RNA and DNA extraction from human cells and murine cells/tissues, PCR, RT-qPCR.
- **Animal Care (mice):**
Mice handling and colony management (wildtype and transgenic);
Drugs/compounds administration (oral gavage, intraperitoneal, intraplantar, intra-articular, intravenous and subcutaneous routes);
Surgery (Ipsilateral sciatic nerve ligation) and bone marrow transplantation.
Behavioural tests for the Evaluation of animal nociceptive thresholds*, locomotory activity**, cognitive function (Novel Object Recognition Test); anxiety- and depressive-like behaviour***.
Clinical score for Experimental autoimmune encephalomyelitis (EAE) progression.
Whole Animal Perfusion Fixation.
Collection of blood, nervous tissues (sciatic nerve, dorsal root ganglia, spinal cord and brain areas), spleen, bone marrow, pancreas, liver, kidneys, skin paws and peritoneal macrophages.

*Automated Von Frey test, acetone drop test, hot/cold plate test, Hargreaves apparatus - plantar test, Randall Selitto, tail flick test, tail immersion test and incapacitance tester. ** Rotarod, static rod, speed walking, pole test, grip test, rearing test. *** Marble burying test, dark/light box, open field test, forced swim test, tail suspension test, sucrose preference test.

IT skills:

Independent user of:

- Microsoft office (MS Word, Excel, Power Point, Outlook)
- FlowJo
- BD FACS Diva
- Graphpad Prism,
- ImageJ (Fiji; NeuronJ),
- WIS-NeuroMath.

ATTIVITÀ PROGETTUALE

Anno	Progetto
2021-current	Effects of SARS-CoV-2 infection in CD4+ T-cells of immunodeficient patients (X-linked agammaglobulinemia and Common Variable Disease). Autoimmunity Lab - Prof. Jens Geginat; Fondazione Istituto Nazionale di Genetica Molecolare (INGM) "Romeo ed Enrica Invernizzi", Milan - Italy
2019-current	Characterization of CD4+ T-cells and their role in the regulation of pathogen-specific responses in patients and mouse model of immune deficiency caused by a mutation in STAT3 (Hyper-IgE syndrome). Autoimmunity Lab - Prof. Jens Geginat; Fondazione Istituto Nazionale di Genetica Molecolare (INGM) "Romeo ed Enrica Invernizzi", Milan - Italy
2017-2018	Analysing the effects of different chemotherapeutic agents and Prokineticin system antagonism on neurite outgrowth of mouse dorsal root ganglia primary sensory neurons. Neurophysiology Lab - Prof. Michaela Kress; Dept. of Physiology and Medical Physics, Medical University of Innsbruck - Austria

UNIVERSITÀ DEGLI STUDI DI MILANO

2016-2019	Investigating the role of a new family of chemokines, Prokineticins, in a murine model of chemotherapy-induced peripheral neuropathy. Pathophysiology of pain, neuroimmunology and drug of abuse Lab - Prof. Paola Sacerdote; <i>Dept. of Pharmacological and Biomolecular Sciences, University of Milan - Italy</i>
2016	Studying the effects of NSAIDs on the release of Calcitonin Gene-Related Peptide and Prostaglandin E2 from rat trigeminal ganglia. Pathophysiology of pain, neuroimmunology and drug of abuse Lab - Prof. Paola Sacerdote; <i>Dept. of Pharmacological and Biomolecular Sciences, University of Milan - Italy</i>
2014-2015	Identification of the effects on pain and on the immune system due to the administration of human adipose derived mesenchymal stem/stromal cells and their conditioned medium in a mouse model of diabetic neuropathy. Pathophysiology of pain, neuroimmunology and drug of abuse Lab - Prof. Paola Sacerdote; <i>Dept. of Pharmacological and Biomolecular Sciences, University of Milan - Italy</i>

CONGRESSI, CONVEgni E SEMINARI

Data	Titolo	Sede
8th Jun 2022	Deep phenotyping of T-cells derived from the aneurysm wall in a pediatric case of subarachnoid hemorrhage. <i>Oral communication</i>	11th MilanMeetsImmunology, Milano - Italy
16-19th May 2022	Phenotyping of T-cells derived from the aneurysm wall in a pediatric case of subarachnoid hemorrhage. <i>Poster</i>	XXX AINI Congress, Riccione - Italy
4-7th Oct 2020	Regulation of T and B cell responses in patients with Hyper-IgE syndrome (HIES). <i>Poster</i>	World Immune Regulation Meeting (WIRM), Davos - Switzerland
26-29th Sept 2019	Involvement of Prokineticin system in a mouse model of vincristine-induced peripheral neuropathy. <i>Poster</i>	XVIII Congresso Nazionale SINS (Società Italiana di Neuroscienze), Perugia - Italy
9-11th May 2019	Prokineticin system as a new target to counteract experimental Vincristine induced peripheral neuropathy. <i>Poster</i>	7th International Congress on Neuropathic Pain (NeuPSIG 2019), London - UK
4-5th Apr 2019	Intraplantarly/intravenously injected secretome from human adipose mesenchymal stromal cells reduce thermal and mechanical hyperalgesia in the monosodium-iodoacetate osteoarthritis model in mice. <i>Poster</i>	GISM 2019 Annual Meeting Congress, Genova - Italy
29th Nov - 1st Dec 2018	Role of Prokineticin system in Vincristine-induced peripheral neuropathy in mouse: focus on gender. <i>Poster</i>	More than neurons congress, Torino - Italy

UNIVERSITÀ DEGLI STUDI DI MILANO

19-22th Sept 2018	Prokineticin system's antagonism: implications in a mouse model of chemotherapy induced peripheral neuropathy. <i>Poster</i>	XXI SIF SEMINAR - PhD Students, Fellows, Post Doc and Specialist Trainees, Bresso (MI) - Italy
4th Jul 2018	Understanding Prokineticin system's role in a mouse model of chemotherapy induced peripheral neuropathy. <i>Oral Communication</i>	9th Next Step Edition, Milano - Italy
10-17th Jun 2018	Investigating the role of prokineticin system in a murine model of chemotherapy-induced peripheral neuropathy. <i>Oral Communication</i>	European Pain School (EPS 2018), Siena - Italy
7-11th Jul 2018	Prokineticin system: a new target to counteract experimental chemotherapy-induced peripheral neuropathy. <i>Poster</i>	11th FENS Forum of Neuroscience, Berlin - Germany
24-28th Oct 2017	Role of Prokineticin system in an experimental model of chemotherapy-induced peripheral neuropathy. <i>Poster</i>	38° Congresso Nazionale della Società Italiana di Farmacologia, Rimini - Italy
29th Jun 2017	Targeting Prokineticin System to counteract experimental chemotherapy-induced peripheral neuropathy. <i>Oral Communication</i>	8th Next Step Edition, Milan - Italy
4-5th May 2017	Antagonism of the Prokineticin system counteracts chemotherapy induced peripheral neuropathy in mice. <i>Oral Communication</i>	Monothematic SIF congress on "The Pharmacological Basis of Novel Pain Therapeutics", Firenze - Italy
