AWARDS, ACKNOWLEDGEMENTS, SCHOLARSHIPS

Year	Description of award
2022	Selected for postdoc fellowship at the Department of Biology, University of Padova, Italy.
2013	Won PhD scholarship under the faculty development program of Bahauddin Zakariya University, Multan-Pakistan Higher Education Commission of Pakistan (HEC) approved doctoral supervisor.

TRAINING OR RESEARCH ACTIVITY

RESEARCH WORK

In the first part of my Ph.D. research, I studied the impact of the import of *orf77* cargo RNA into Mitochondria on transcriptome analysis by using RT-PCR. In the second part, the influence of *orf77* cargo-induced transcriptome changes on plant physiology was studied. These findings have been published in **Cells (doi.org/10.3390/cells8060583) as a first author**. Then I studied the role of OEX protein in the DNA repair system in plants. The manuscript from this work is in the pipeline. During postdoc project, I studied SOUP: signaling the organelle-folded protein response in plants. In this research, I have applied temperature (42°C) and doxycycline stresses in plants to analyze the transcriptome response at the molecular level by increasing the expression of genes associated with the mitochondrial stress response, such as alternative oxidase and mitochondrial heat shock proteins 70-1 and 5. At the phenotypic level, it is related to retardation of growth, inhibition of the primary root, and elongation of the root hairs. The research article is in the pipeline. So far, I have published 27 research articles

OTHER INFORMATION

2 Doctoral students are preparing their thesis under my supervision.

1 Ph.D. student defended his thesis successfully under my supervision.

13 Master students completed their thesis under my supervision and currently 2 are working on their projects.

Expertise's:

- Strong background in molecular biology and plant science.
- Experience with confocal microscopy and approaches for genetic manipulation, tissue culture, and organelle genetics in plants as well as managing a lab.
 - Isolation and estimation of genomic DNA/RNA, cDNA synthesis, PCR amplification, Restriction digestion, carried out agarose and quantitative real-time PCR of expression analysis.
 - Experienced in sample preparation for transcriptome analysis by N.G.S
 - Knowledge of computational and statistical analysis of biological systems by using software's *viz.* SPSS-17, and GraphPad Prism 5, BLAST, programing using Python and R, Primer design using NCBI and other web based bioinformatics tools.
- Experienced in Genome-wide association studies (GWAS) analysis.

- Data analysis, manuscript preparation.
- Isolation and estimation of proteins, PAGE-SDS & Native.
- Student supervision at Master and Doctoral level.

Main research direction:

- Plant Mitochondrial Genetics.
- Cop Stress physiology and Molecular Biology,
- Plant Cell signal Transduction

Teaching Experience:

- Introduction to Life Sciences (undergraduate)
- Experimental Techniques in Modern Botany (Undergraduate)
- Plant Physiology and Experiments (undergraduate).
- Topics in Botany and Developmental Biology. (Ph.D. Candidates).
