RESEARCH ASSISTANT at Pasteur Institute of Iran (JUNE 2020 - PRESENT): Official working experience (full-time) at Influenza and Respiratory Viruses Department. Conducting research projects including molecular and cellular tests (PCR, RT-PCR, VNT, ELISA, Flowcytometry, ...) regarding influenza diagnosis and treatment. Risk assessment responsibility. Quality control of primary cell culture room and standards of facilities such as incubator, BL2 equipments and stations.

Member of Student Research Committee at MOTAMED Breast cancer center, Tehran, Iran (2019-2020): Participating in several breast cancer research projects, focusing primarily on data collection, patient research, and data analysis. My work has included two significant systematic reviews on biomarkers in breast cancer, specifically on EGFR2 (Epidermal Growth Factor Receptor 2) and CTC (Circulating Tumor Cells). These reviews aimed to identify and analyze the potential of these biomarkers in the prognosis and treatment of breast cancer.

ALTRE INFORMAZIONI

I want to express my interest and assume that I am well-prepared for this fellowship due to my extensive background and expertise. As a pharm.D. graduate, I may not proceed the routine way of pharmacists, however I am deeply passionate about scientific research and advancement and eager to immerse myself in the stimulating and cutting-edge biomedical research that Milan university has to offer. As a research assistant at the Pasteur Institute of Iran, I have acquired comprehensive hands-on experience in RNA sequencing and various molecular techniques as well as My abilities and skills in cell culture (2D and 3D), transfection methods, cloning, gel electrophoresis, plasmid extraction, SDS-PAGE, immunoblot, PCR, cDNA synthesis, genome sequencing (NGS), virus RNA replication and confocal and fluorescent microscopy analysis. I have made significant contributions to multiple breast cancer research projects, particularly in the areas of data collection, patient research, and data analysis, included conducting systematic reviews on biomarkers such as EGFR2 and CTC in breast cancer, which substantially enhanced our understanding of their roles in prognosis and treatment.

These experiences have endowed me with the necessary skills to excel in the proposed research activities. I am highly enthusiastic about the prospect of contributing to the PRO-FUTURE project under the supervision of Prof. Agostoni.
