

UNIVERSITÀ DEGLI STUDI DI MILANO

selezione pubblica per n. 1 posto di Ricercatore a tempo determinato in tenure track (RTT), riservata ai sensi dell'art.14 comma 6-septiesdecies del decreto legge 30 aprile 2022, n. 36 convertito con modificazioni, dalla Legge 29 giugno 2022, n. 79 per il settore concorsuale CHEM-03/A - Chimica generale e inorganica, Gruppo scientifico-disciplinare: 03/CHEM-03 - Chimica generale e inorganica presso il Dipartimento di CHIMICA, (avviso bando pubblicato sulla G.U. n. 99 del 13/12/2024) - Codice concorso: 5675

Caterina Damiano

CURRICULUM VITAE

INFORMAZIONI PERSONALI

COGNOME	DAMIANO
NOME	CATERINA
DATA DI NASCITA	04/04/1989
ORCID	0000-0001-5903-238X
SCOPUS AUTHOR ID	57194577457

RUOLO ATTUALE

From 1 st June 2023 to present	Fixed-term Researcher - Type A (RTD-A) Research interests: <ul style="list-style-type: none">• CO₂ valorization: In order to contribute to the transition from linear to circular chemical processes, the research activity is mainly focused on the use of CO₂ as a C1 renewable raw material to produce high added-value fine-chemicals, such as cyclic carbonates and oxazolidinones, which address different end-use customers. Besides the production of largely-used cyclic carbonate solvents, the synthesis of oxazolidinones, which are precursors of pharmaceutical species has also been investigated. These transformations are efficiently promoted by low-cost and low-toxic porphyrin-based catalytic systems.• Synthesis of fine chemicals: The research activity is mainly devoted to the eco-compatible synthesis of fine chemicals by new C-C and C-N bond formations. Organic azides (ArN₃) and diazo-compounds (RR'CN₂) are employed as atom efficient reagents to transfer nitrene and carbene functionalities to saturated and unsaturated hydrocarbons, respectively. These synthetic procedures are responsible for the synthesis of aziridines, allylic amines, benzylic amines, imines, phenanthridines, indoles and cyclopropane-containing molecules. This approach ensures an atom-efficient and eco-sustainable strategy in which N₂ is the only by-product and it also allows the transformation of low-cost compounds, such as hydrocarbons, into high-added value derivatives. These synthetic transformations are efficiently catalyzed by low-toxic metal porphyrin complexes, which show "green" transition metals of the first row as active catalytic centers.

	<ul style="list-style-type: none"> • Heterogenization of homogeneous catalysts: To increase the eco-sustainability and atom-efficiency of the above-mentioned catalytic processes, the research activity is focused on the development of metal porphyrin complexes anchored on polymeric membranes or cellulose-based materials. This approach allows to exploit the advantages of both homogeneous and heterogeneous catalysis. In fact, benefits of a 'single site' catalysis are coupled with an easy recovery and recycling of the catalyst. • Synthesis of chemosensors: In view of the spectroscopic, photophysical and redox features of porphyrins and metal porphyrins, the research activity is devoted on the synthesis of metal porphyrin complexes which can be employed as high selective chemosensors for analyzing the presence of emerging pollutants in water and air as well as of food contaminants. The chemical versatility of metal porphyrins allows several skeleton modifications and the introduction of a large class of transition metals into the porphyrin core. This synthetic approach permits modulation of the porphyrin structure with respect to the target analyte as well as fine-tuning the analyte/chemosensor interaction.
--	---

TITOLI

TITOLI DI STUDIO

<u>March 2016</u>	Master's Degree in Chemical Sciences 110/110 Obtained on 22/03/2016 at University of Naples "Federico II" Supervisor: Prof. A. Lombardi Thesis project: <i>"New ruthenium porphyrin-peptide conjugates: synthesis and characterization"</i> The main competencies are the synthesis, purification and characterization of metal-porphyrin-peptide covalent compounds.
<u>December 2012</u>	Bachelor's Degree in Chemistry 100/110 Obtained on 12/12/2012 at University of Naples "Federico II" Supervisor: Prof. F. Ruffo Thesis project: <i>"Synthesis of chiral tetradentate N, N', O, O' ligands based on glucose"</i> The main competencies are the synthesis and characterization of chiral ligands for asymmetric catalysis.
<u>July 2008</u>	Diploma scientifico 84/100 Liceo scientifico "E. Fermi", Montesarchio (BN)

TITOLO DI DOTTORE DI RICERCA O EQUIVALENTI, OVVERO, PER I SETTORI INTERESSATI, DEL DIPLOMA DI SPECIALIZZAZIONE MEDICA O EQUIVALENTE, CONSEGUITO IN ITALIA O ALL'ESTERO

<u>January 2020</u>	PhD in Chemical Sciences - European Doctorate Obtained on 29/01/2020 at University of Milan Supervisor: Prof. E. Gallo Thesis project: <i>"Hybrid catalysts for carbene and nitrene transfer reactions"</i> The main competencies are the synthesis and catalytic application of hybrid systems derived from the incorporation of metal porphyrin complexes into bio-scaffolds.
	<u>February 2018 - July 2018:</u> <i>Erasmus+traineeship programme</i> at University of Rennes under the supervision of Prof. B. Boitrel .

TITOLI DI CUI ALL'ARTICOLO 24 COMMA 3 LETTERA A) E B) DELLA LEGGE 30 DICEMBRE 2010, N. 240 (CONTRATTI DI RICERCA, ASSEGNI DI RICERCA O EQUIVALENTI)

From 1 st June 2023 to present	Fixed-term researcher Type A (RTD-A) From 01/06/2023 to present (18 months) University of Milan Supervisor Prof. E. Gallo
From 1 st March 2022 to 31 st May 2023	Postdoctoral researcher Type A From 01/03/2022 to 31/05/2023 (14 months) University of Milan Supervisor Prof. E. Gallo
From 1 st March 2020 to 28 th February 2022	Postdoctoral researcher Type A From 01/03/2020 to 28/02/2022 (24 months) University of Milan Supervisor Prof. E. Gallo

ATTIVITÀ DIDATTICA A LIVELLO UNIVERSITARIO IN ITALIA O ALL'ESTERO

TUTORING (Frontal Lessons)	
AA 2024/2025	Professor for “Chimica Generale con elementi di chimica fisica” - 6 CFU - SSD CHIM/03 (University of Milan, <i>corso di Laurea in Scienze Biologiche</i>) from November 2024 to January 2025 (56 hours of frontal lessons)
AA 2023/2024	Professor for “Laboratorio di Chimica (con prevenzione e sicurezza) (modulo)” - SSD CHIM/03 (University of Milan, <i>corso di Laurea in Scienze Biologiche</i>) from March 2024 to June 2024 (16 hours of frontal lessons)
AA 2023/2024	Professor for “Laboratorio di Chimica Generale ed Inorganica” - SSD CHIM/03 (University of Milan, <i>corso di Laurea in Biotecnologie</i>) from October 2023 to November 2023 (16 hours of laboratory)
AA 2024/2025 AA 2023/2024	Assistant for “Laboratorio di Chimica dei Composti di Coordinazione” - SSD CHIM/03 (Prof. A. Caselli and Prof. C. Dragonetti - University of Milan, <i>corso di Laurea in Chimica</i>) from October 2023 to November 2023 (24 hours) and from October 2024 to November 2024 (24 hours). For a total of 48 hours in two academic years . Assistant for “Laboratorio di Chimica Inorganica A” SSD CHIM/03 (A. Caselli - University of Milan, <i>corso di Laurea Magistrale in Scienze Chimiche</i>) from November 2023 to January 2024 (24 hours) and from November 2024 to December 2024 (24 hours). For a total of 48 hours in two academic years .
AA 2022/2023 AA 2021/2022	Exercise Tutor for “Chimica Generale e Inorganica” (University of Milan, <i>corso di Laurea in Scienze e Tecnologie per lo studio e la conservazione dei beni culturali e dei supporti della informazione</i>) from November 2021 to January 2022 (18 hours of frontal lessons) and from November 2022 to January 2023 (15 hours of frontal lessons) (Prof. Francesco Ferretti) for a total of 33 hours of frontal lessons in two academic years .
AA 2017/2018	Exercise Tutor for “Chimica Generale e Inorganica/Laboratorio di Chimica Generale e Inorganica” (University of Milan, <i>corso di Laurea in Scienze Chimiche</i>) from November 2017 to January 2018 (15 hours of frontal lessons) (Prof. Fabio Ragaini, Prof. Francesca Tessore).
TUTORING (Master and PhD theses)	
From AA 2020/2021 to present	Co-Tutor of master theses in Chemical Sciences: 1) “Sintesi e caratterizzazione di chemosensori per 2,4,6-tricloroanisolo (TCA) nei tappi di sughero (2020)” student: M. Maffei; 2) “Utilizzo della CO ₂ come sorgente di unità C1 per sintesi di composti della chimica fine (2020)” student: F. Belnome; 3) “Studio dell’attività catalitica di porfirine protonate nella sintesi di N-alchil

	<p>ossazolidinoni a partire da CO₂ ed N-alchil aziridine (2021) student: F. Ravasio;</p> <p>4)“Transfer di unità nitreniche da 4-nitrofenil azide ad aniline variamente sostituire catalizzato da complessi porfirinici di cobalto (II) (2021)” student: N. Beretta;</p> <p>5)“Low-cost solid supported Zn-porphyrin for the efficient photo-oxidation of aldehydes (2021)” student: G. Zoccoler</p> <p>6)“Carbon dioxide cycloaddition to epoxides promoted by homogenous and heterogenous catalytic systems (2022)” student: A. Rutigliano</p> <p>7)“Sintesi di ossazolidinoni promossa da catalizzatori eterogenei a base porfirinica (2023)” student: A. Fata</p> <p>8)“The Valorization of CO₂ as a C1 Building Block for the Synthesis of Fine Chemicals (2023)” student: L. Invernizzi</p> <p>9)“Designing Iron Porphyrins for the Development of Cellulose-Based Heterogeneous Catalysts (2023)” student: M. Locate</p> <p>Co-tutor of two PhD thesis in Chemical Sciences:</p> <p>1)“Free-base porphyrins for CO₂ Activation” (2022) PhD student: P. Sonzini</p> <p>2)“Solid-Supported Porphyrins for Catalysis and Sensing”(2024) PhD student: M. Cavalleri</p>
<u>AA 2024/2025</u>	<p>Tutor of bachelor thesis in Chemistry in progress during the 2024/2025 academic year. Student: F. De Francesco</p> <p>Co-Tutor of PhD and master theses in Chemical Sciences in progress during the 2024/2025 academic year. Students: G. Aleo and L. Invernizzi (PhD).</p>
ASSISTANCE	
<u>AA 2022/2023</u> <u>AA 2021/2022</u> <u>AA 2020/2021</u>	<p>Laboratory Assistant for “Chimica Inorganica A” (University of Milan, <i>corso di Laurea Magistrale in Scienze Chimiche</i>) from November 2020 to January 2021 (40 hours), from November 2021 to January 2022 (40 hours) and from November 2022 to January 2023 (24 hours) (Prof. Alessandro Caselli)” for a total of 104 hours in three academic years.</p>
<u>AA 2018/2019</u>	<p>Laboratory Assistant for “Chimica organica e Laboratorio di Chimica/Modulo: Laboratorio di Chimica(con prevenzione e sicurezza)” (University of Milan, <i>corso di Laurea in Scienze Biologiche</i>) from March 2019 to May 2019 (20 hours) (Prof. Lucia Carlucci)”.</p>
	Assistant for Bachelor, Master and PhD students.

DOCUMENTATA ATTIVITÀ DI FORMAZIONE O DI RICERCA PRESSO QUALIFICATI ISTITUTI ITALIANI O STRANIERI

<u>From June 2023 to present</u>	Research at the University of Milan as fixed-term researcher - type A (RTD-A)
<u>From February 2023 to July 2023</u>	Training/Research as visiting researcher at the University of Huelva (Spain) under the supervision of Prof. P. Pérez
<u>From March 2020 to May 2023</u>	Training/Research at the University of Milan as a Postdoctoral researcher under the supervision of Prof. E. Gallo
<u>From February 2018 to July 2018</u>	Training/Research at the University of Rennes (France) for the <i>Erasmus+traineeship programme</i> under the supervision of Prof. B. Boitrel
<u>From October 2016 to January 2020</u>	Training/Research at the University of Milan for the PhD in Chemical Sciences under the supervision of Prof. E. Gallo
<u>From December 2015 to March 2016</u>	Training/Research at the University of Naples “Federico II” for the Master thesis in Chemical Sciences under the supervision of Prof. A. Lombardi

From September 2012 to November 2012	Training/Research at the University of Naples “Federico II” for the Bachelor thesis in Chemical Sciences under the supervision of Prof. F. Ruffo
--------------------------------------	--

REALIZZAZIONE DI ATTIVITÀ PROGETTUALE

<u>2024</u>	PI of the project titled “Sistemi catalitici eterogenizzati a basso impatto ambientale per la sintesi sostenibile di composti” granted by University of Milan for PSR (Piano di Sostegno alla ricerca - Linea 2)
<u>2023</u>	Member of the research team of the project titled “CO ₂ valorization by a low economic impact biorefinery (CO ₂ VALE) granted by Fondazione Cariplo , call: ‘Economia Circolare - 2022’ (granted € 299.250,00, Project number: 2022-0781)
<u>2023</u>	Member of the research team of the PRIN project titled “Carbon Dioxide VALorization by chemical, Photo- and Electro-chemical processes (CADIVAPE) - granted by MUR (Project number: 2022FWAF2M_003)
<u>2023</u>	Member of the research team of the PRIN-PNRR project titled “Functionalized CoLoR Catcher for waTEr quality maNagement: case stUdy aPplications (CLEANUP) - granted by MUR (Project number: P20229WSPC_002)

ORGANIZZAZIONE, DIREZIONE E COORDINAMENTO DI GRUPPI DI RICERCA NAZIONALI E INTERNAZIONALI, O PARTECIPAZIONE AGLI STESSI

<u>From 2016 to present</u>	Member of the research group of Prof. E. Gallo, University of Milan. 2016-2020: PhD student; 2020-2023: Postdoctoral researcher; 2023-present: RTD-A
<u>2023</u>	Visiting researcher to the research group of Prof. P. Pérez, University of Huelva (Spain).
<u>2018</u>	Visiting PhD student to the research group of Prof. B. Boitrel, University of Rennes (France).
<u>2015 - 2016</u>	Member of the research group of Prof. A. Lombardi, University of Naples “Federico II” Master student
<u>2012</u>	Member of the research group of Prof. F. Ruffo, University of Naples “Federico II” Bachelor student

ATTIVITÀ DI RELATORE A CONGRESSI E CONVEGNI NAZIONALI E INTERNAZIONALI

CONFERENCE COMMUNICATIONS	
Oral communication	<p>7) “Hemin Derivatives Anchored onto ColourCatcher®: Catalytically Active and Bio-Compatible Materials for CO₂ Valorisation and C-C Bond Formation” Oral communication at “ISHC2024 - XXIII International Symposium on Homogeneous Catalysis”, Trieste, 21st - 26th July 2024.</p> <p>6) “Heterogenization of biodegradable hematin onto Colour Catcher® for the halogen-free cycloaddition of CO₂ to three-membered rings” Oral communication at “JCC2024 - French-Italian Coordination Chemistry Days”, Strasburg, 24th - 26th January 2024.</p> <p>5) “Naturally-based heterogenized iron porphyrins for the efficient and eco-compatible transfer of carbene and C1 units” INVITED Oral communication at “ISCN - International Symposium on Carbene and Nitrene Chemistry”, Amsterdam, 25th - 28th July 2023.</p> <p>4) “When daily life meets the lab: Colour Catcher® sheets as solid supports for porphyrin-based photocatalysts and optical sensors” Oral communication at “XLVIII Congresso Nazionale di Chimica Inorganica”, Pisa, 6th-9th September 2022.</p>

	<p>3) "Porphyrin-based catalysts: versatile tools for the atom-efficient synthesis of heterocyclic compounds" Oral communication at "44th ICCC: International Conference of Coordination Chemistry", Rimini, 28th August -2nd September 2022.</p> <p>2) "Porphyrin@CC: from laundry sheets to low-cost optical sensors and photocatalysts" INVITED Oral communication at "ICPP-12: International Conference on Porphyrins and Phthalocyanines", Madrid, 10th-15th July 2022.</p> <p>1) "Efficient and low-cost metal-free Porphyrin/TBACl system for the CO₂ valorization into N-alkyl and N-aryl oxazolidin-2-ones" Oral communication at "XXVII Congresso Nazionale della Società Chimica italiana", on-line conference, 14th-23rd September 2021)</p>
Poster communication	<p>5) "From Washing machine to reaction flask: Colour Catcher® sheets for realizing catalytically active and bio-compatible porphyrin-based materials" Poster presented at "9th EuChemS Chemistry Congress", Dublin, 7th-11st July 2024.</p> <p>4) "Iron and ruthenium glyco-conjugated porphyrins: eco-friendly catalytic systems for three membered rings synthesis" Poster presented at "XLVII Congresso Nazionale di Chimica Inorganica", Bari, 9th-12nd September 2019.</p> <p>3) "Metal Porphyrin-Catalysed Cycloaddition of CO₂ to Aziridines" Poster presented at "XLVI Congresso Nazionale di Chimica Inorganica", Bologna, 10th-13rd September 2018.</p> <p>2) "Mass Spectroscopy: an Useful Tool for Mechanistic Studies" Poster presented at "2nd SSM: Seminario di Spettrometria di Massa", Milano, 23rd June 2017.</p> <p>1) "Glycoporphyrin catalysts for carbene and nitrene transfer reactions" Poster presented at "11st International School of Organometallic Chemistry (ISOC2017)", San Benedetto del Tronto, 2nd-6th September 2017)</p>
Organization/ Secretariat of scientific conferences	<p>Member of the organizing committee of "IMPP-3: The Italian meeting on Porphyrins and Phthalocyanines 2025", which will be held in Milan from 25th to 27th June 2025.</p> <p>Member of the organizing committee of "44th ICCC: International Conference of Coordination Chemistry", Rimini, 28th August -2nd September 2022.</p> <p>Member of the secretariat of "ISPC 2019: International School of Process Chemistry", Gargnano (BS), 12nd-15th May 2019.</p>

ATTIVITA' EDITORIALE

<u>From 2024</u>	Reviewer for SynOpen.
<u>From 2023</u>	Reviewer for Molecules.

CONSEGUIMENTO DI PREMI E RICONOSCIMENTI NAZIONALI E INTERNAZIONALI PER ATTIVITÀ DI RICERCA

<u>2018</u>	Erasmus+Traineeship programme at Université de Rennes 1 (Francia), 6 months .
<u>2017</u>	Dalton Transactions Prize for best Poster at 11 th International School of Organometallic Chemistry (ISOC2017), S. Benedetto del Tronto (AP), September 2017.
<u>2016</u>	Scholarship for PhD at Università degli Studi di Milano, 3 years .

INCARICHI ISTITUZIONALI

<u>From 2024 to present</u>	Chemistry department Representative in the “Council of Temporary Researchers” of University of Milan (December 2024 - present)
<u>From 2024 to present</u>	Member of the website committee of the chemistry department of University of Milan (January 2024 - present)
<u>From 2024 to present</u>	Member of judging committees for the awarding of type B post-doc research grants at the chemistry department of University of Milan (competition notices: January 2024 ID6185, February 2024 ID 6377, December 2024 ID 6971)
<u>From 2020 to 2023</u>	Chemistry department Representative in the “Council of Research Fellows” of University of Milan (December 2020 - May 2023)

APPARTENENZA A SOCIETA' SCIENTIFICHE

	Member of the Italian Chemical Society (SCI) Member of the “Gruppo Interdivisionale di Chimica Organometallica (GICO)” of Italian Chemical Society (SCI) Member of the Society of Porphyrins & Phthalocyanines (SPP)
--	---

TERZA MISSIONE

<u>2024</u>	MeetMeTonight 2024, 28 th September 2024, Milano.
<u>2024</u>	Milano Green week , 26 th September 2024, Milano.
<u>AA 2017/2018</u>	Laboratory Assistant for “Progetto Nazionale Lauree Scientifiche (PLS)”, (University of Milan) September 2018 (15 hours) (Prof. A. Silvani, Prof. P. Mussini).
<u>2017-2018</u>	MeetMeTonight 2018, 28th-29th September 2018, Milano. MeetMeTonight 2017, 29th-30th September 2017, Milano.

CAPACITA' E COMPETENZE PERSONALI

LANGUAGE				
	Mother tongue(s): Italian			
	Other language(s): English			
	Listening	Reading	Spoken interaction	Spoken production
	B2	B2	B2	B2
Levels: A1/A2: Basic user - B1/B2: Independent user - C1/C2: Proficient user (Common European Framework of Reference for Languages)				
LABORATORY SKILLS				
	Familiar with standard Schlenk techniques to work under a protective atmosphere. Abilities in the synthesis of porphyrins, metal complexes, porphyrin-peptide/sugars conjugates and solid phase peptide synthesis (SPPS). Use of the common and most important laboratory instruments:			
	<ul style="list-style-type: none">• Characterization and purification by chromatographic techniques (HPLC, UHPLC and direct phase chromatography) both on analytic and preparative scale.• Characterization by mass spectrometry analysis (LC-MS, GC-MS, ESI-Q, ESI-IT-TOF), spectroscopic techniques (UV-Vis and Circular Dichroism) and NMR and EPR spectroscopy.			
COMPUTER SKILLS				
	Good knowledge of Microsoft Office, Origin, MestreNova, VMD and PyMol
